

## District Goals 2011-2012

To ensure the Madison School District fulfills its mission to “create challenging academic experiences that equip all students to excel as members of the community” and reflects a strategic focus. We propose the following long-term goals:

- 1) Ensure that each Madison District student achieves annual academic growth that drives MSD to maintain and/or increase the Arizona LEARNS Labels by 2011-2012.
- 2) Ensure that the Madison School District maintains a fiscally responsible financial environment through 2010.
- 3) Increase the quality and quantity of internal and external communication systems to keep students, staff, parents, community and business partner informed and connected regarding key district issues.
- 4) Raise a cumulative one million dollars through the Madison Education Foundation by 2011-2012 to be used to advance the vision, mission, and goals of the Madison School District.

\*The initiatives and action plans will incorporate key values such as: technology, marketing, and professional development as needed to advance each goal.
